IMMEDIATE RELEASE

Dec. 7, 2012

SOLDIER KIA DURING VIETNAM WAR IDENTIFIED

The Department of Defense POW/Missing Personnel Office (DPMO) announced today that the remains of a U.S. serviceman, killed in action during the Vietnam War, have been identified and will be returned to his family for burial with full military honors.

Army Capt. James M. Johnstone, 28, of Baton Rouge, La., will be buried Dec. 12, in Arlington National Cemetery near Washington, D.C. On Nov. 19, 1966, Johnstone was the pilot of an OV-1A Mohawk aircraft that crashed while conducting a daytime reconnaissance mission over Attapu Province, Laos. Nearby U.S. aircrews reported seeing the wing of Johnstone's aircraft hit a tree during a climb to avoid a nearby ridgeline. No parachutes were seen exiting the aircraft. Heavy enemy presence in the area prevented recovery efforts.

From 1993 to 2009, joint U.S./Lao People's Democratic Republic (L.P.D.R.) teams, led by the Joint POW/MIA Accounting Command (JPAC), interviewed multiple witnesses, and conducted several investigations and excavations of the crash site in Attapu Province. The teams located human remains, military equipment, an identification card bearing Johnstone's name, and aircraft wreckage of an OV-1A, which correlated with the last known location of Johnstone's aircraft.

To identify the remains, scientists from JPAC analyzed circumstantial evidence and used forensic identification tools, such as dental comparisons.

Today, the U.S. government continues to work closely with the governments of Vietnam, Laos, and Cambodia to recover Americans lost during the Vietnam War.

For additional information on the Defense Department's mission to account for missing Americans, call (703) 699-1169 or visit the DPMO Web site at www.dtic.mil/dpmo.
